PadelPriceGuide

Racket shortlist worksheet

Three rackets, side by side, in your own handwriting. Fill it in while you shop, take it to the club, and ask to hit with the ones you have shortlisted before you spend anything.

First, what are you buying for?

How often do you play?	
Any arm or shoulder trouble?	
What do you want more of: control, power, or comfort?	
Budget, shipping included	

Then compare three

	RACKET 1	RACKET 2	RACKET 3
Model and year			
Shape			
Weight (g)			
Balance (mm)			
Core and feel			
Face material			
Cheapest US store			
Total with shipping			
Hit with it? How did it feel?			

Before you pay, three checks: is it the current year's model or last year's (last year's is often the same racket for much less)? Does the price include shipping? Is it in stock now, or on backorder?

Rules of thumb

Between two weights, take the lighter. Between two shapes, take the rounder. You can add weight with lead tape; you cannot take it away, and you cannot change the shape.

Where the numbers come from

Look up any model at padelpriceguide.com for published specs with sources, and what every US store we track charges today, shipping included.
